

Birthday Parties for Grown-Ups

Of course we should keep celebrating our birthdays in a big way! We all deserve to take a break from the day-to-day stress and spend an evening **celebrating** the day we arrived.

Whether you're throwing a party for yourself or a loved one, give your guests something special in exchange for the gifts they're bringing. Nothing **breaks the ice** and creates **excitement** better than *live music*.

Imagine throwing a party for your husband's 40th birthday and having all of his favorite songs playing live throughout the evening. **He'll love you for it!** *What a great gift.*

You can choose any musical configuration: solos, duos, trios, or my band, *Joint Venture*. I can provide background music or something more animated to get people singing or dancing. Check out my *extensive song list* on this website and we can customize a repertoire just right for the birthday girl or boy.

I can provide a PA system so people can make toasts or express *thanks*. I can also act as MC if you want someone to make announcements.

Call or email me and let's talk about music and parties!
